1916.

NOTE.

THE correspondence printed in this collection commences with a letter which was addressed in 1825 by the Judges of the Court of Sadr Adalat to the Governor in Council on the subject of the jurisdiction of District Munsifs in dealing with landed property and of the valuation of land for the purposes of such jurisdiction. The Court of Sadr Adalat considered that the rules for the valuation of land required revision and the Governor in Council, accepting this opinion, called upon the Board of Revenue for information as to the number of years' purchase of the income from land which might be regarded as representing its value for the purposes of determining the jurisdiction of the Courts. The Board of Revenue in turn applied to the Court of Sadr Adalat for information regarding the value of lands which had been sold by the Courts and also called upon Collectors of districts for information on the same subject. Both Courts and Collectors furnished returns, which were submitted by the Court of Sadr Adalat and the Board of Revenue to Government and in 1833 the Court of Sadr Adalat prepared a draft regulation for determining the jurisdiction of Civil Courts with reference to the valuation of land. These papers have been printed both as containing useful and interesting information regarding the value of land in the early years of the nineteenth century and also as throwing light upon the meaning of certain revenue terms which were then in common use, especially the words *Mālguzari* and *Lakhiraj* land as to the meaning of which certain doubts have been expressed.

SECTION A.

CORRESPONDENCE BETWEEN THE COURT OF SADR ADALUT AND THE GOVERNMENT REGARDING LAND VALUATION FOR PURPOSES OF JUDICIAL JURISDICTION.

SADR ADALUT.

To

THE SECRETARY TO GOVERNMENT
IN THE JUDICIAL DEPARTMENT.

(No. 69.)

SIR,

* Letter from Provincial Court of Appeal, Western Division, dated 25 May 1821.
* Letter to Provincial Court of Appeal, Western Division, dated 24 January 1824.
Letters from Provincial Court of Appeal, Western Division, dated 21 December 1824 and 19 January 1825.
* Letter from Provincial Court of Appeal, Northern Division, dated 8 October 1824.

I am directed by the Judges of the Court of Sadr Adalut to transmit to you for the purpose of being laid before the Hon'ble the Governor in Council the papers noted in the margin.

2. The letter from the Provincial Court of Appeal in the Western Division of 25th May 1821 was accompanied by minutes recorded by the 2nd and 3rd Judges respectively declarative of their concurrent opinion against the policy of allowing to District Munsifs in Malabar and Canara final jurisdiction in claims for landed property "however trifling in value."

3. The 2nd Judge considering that the provisions of Section XLIII, Regulation VI of 1816, might be perverted to answer views the most corrupt, and in their consequences most dangerous to the peace of the country, suggested "that all decisions of District Munsifs which might involve property in land although the annual clear rent be under 10 rupees should be appealable to the Zillah Courts."

4. The 3rd Judge concurred in the expedience of this modification of the law and suggested that it should "have a retrospective effect; that is, "that all persons who conceive themselves aggrieved by the decisions of "a Munsif in suits for lands of the description specified in the first part "of the above quoted section should be permitted to appeal therefrom on "performance of the general conditions of appeal, within thirty days "from the promulgation of the enactment which 'might' eventually be "passed in modification of this section."

5. The 3rd Judge also "referring to the consequences to the prosperity "of the country from the extension of the powers of Sadr Ameens and "District Munsifs by the provisions of Sections III and IV, Regulation "II of 1821" considered it to be "equally a measure of justice and policy

---

* Not printed.

"to new model the present mode of estimating the value and amount of "landed property, so as to bring both descriptions of lands, viz., those "exempt from the payment of revenue and those subject to it within the "standard fixed for hearing and deciding suits for all other real property "and for personal property."

6. The 3rd Judge observed that the limitations, which at present guide the courts of judicature, are ill adapted to the provinces of Malabar and Canara, that the jurisdiction of Sadr Ameens and District Munsifs is now so extended, "as to embrace nearly the whole landed property of these two provinces," there being very few estates by which he meant "lands known and registered by a particular name, by certain defined "boundaries and bearing a distinct rent and assessment, the annual "produce whereof in the regulation sense of that term exceeds the "amount, limited for" their "cognizance of suits for lands either exempt from or subject to the payment of revenue."

7. The 3rd Judge proceeded to explain that under the regulations a land, subject to the payment of revenue, yielding an annual produce of 750 or 500 rupees is equivalent to land exempt from the payment of revenue yielding only an annual produce of 75 or 50 rupees and that calculating both descriptions of lands at the maximum of the amount and value of property, which the Sadr Ameens and District Munsifs are respectively empowered to adjudicate upon under the provisions of Sections III and IV, Regulation II, A.D. 1821, lands exempt from the payment of revenue would seem to be estimated at 10 years' annual produce and those subject to the payment of revenue at one year's ; whereas in Malabar and Canara, the price of the former is from 20 to 40 years' purchase and the latter reckoning the assessment at half the annual produce from 10 to 20 years' purchase, according to the goodness of the soil and other local advantages : that consequently unless some alteration should be made in the mode of estimating landed property lands exempt from revenue to the Government worth from 15,000 to 30,000 rupees, and lands subject to revenue worth from 7,500 to 15,000 rupees may be adjudicated upon by Sadr Ameens ; and lands exempt from revenue to the value of from 10,000 to 20,000 rupees, and subject to revenue to the amount of from 5,000 to 10,000 rupees may be adjudicated upon by District Munsifs.

8. The 3rd Judge proceeded to state his opinion that "the only correct "criterion for estimating lands the cause of action in suits cognizable by "*all* the courts of judicature in Malabar and Canara" is "by the value or "purchase price, which should" in consequence "of the fluctuating "nature of landed property, especially in Malabar, rest with the parties "concerned in the same way as is observed under the regulations with "respect to a house, garden or any other description of immoveable or "moveable property, viz., by leaving the plaintiff to state the value according "to his own estimate of the amount in which he may have been indamaged, "and in cases of dispute between the parties, as to the correctness of such "estimate to give them the benefit of the rules, made and provided in "Sections IV and V, Regulation XII of 1809, for the guidance of the "Provincial and Zilla Courts in similar cases."

9. In reply to this reference the Judges of the Sadr Adalut, in their letter of 24th January 1824, called for "clear and precise information "respecting the mode in which the annual produce of land is estimated "in" the western "division with reference to the provisions of Section III, "Regulation III of 1802"; citing a note in Mr. Harrington's analysis, which explains that the public assessment is taken to be in the proportion of nine-tenths of the entire rent produce of the year after deducting the charges of management and therefore the entire rent produce of Malguzary land for one year is equivalent to the proprietor's income for ten years after deducting the charges of management and the revenue payable to Government. It was remarked that the rule is easily applicable to

lands held under Zemindari or Talookdari tenures, when the right to hold those tenures is the subject of dispute ; that it would seem indeed that those tenures only were contemplated when the enactment was framed ; that even as regards these tenures the correctness of the estimate depends upon the proportion which the public assessment bears to the entire rent produce of the year, after deducting the charges of management, and that there could be no doubt that in very many cases it would not be found even in the settled districts to bear the proportion assumed as the basis of the estimate ; viz., nine-tenths. The judges observed that the principle of this rule evidently was that ten times the net annual income derived to the holder should be the standard by which the value of the property should be estimated and a general rule of this nature, it was remarked, should be applied with reference rather to its spirit than to its letter ; and that upon this principle and supposing the data upon which the calculation is formed to be correct, as applied to the lands of Malabar and Canara, the final jurisdiction of a District Munsif under the provisions of Section XLIII, Regulation VI of 1816, would extend only to land which yields to the proprietor a net annual income of two rupees.

10. In the minute of the 2nd Judge of the Provincial Court of Appeal in the Western Division, submitted under date 21st December last, he observes that if in the districts permanently settled under the Madras Presidency, the remission of the Government dues exceeded the proportion of one-tenth of the entire rent produce after deducting the expenses of management, the value of a Zemindari under this Presidency would be greater than under Bengal, that the process of bringing waste land into cultivation would further augment the profit of the Zemindar and that "the principle by which the value of land is estimated in the Regula- "tions, though justly applicable on the introduction of the permanent "settlement must long ere this have ceased to be correct in the Zemin- "daris, which have been improved in value by extended cultivation."

11. The 2nd Judge proceeds to state that although it has appeared in suits instituted in that division, that the Government assessment has been found to bear a less proportion than nine-tenths the entire rent has "under a literal construction of the regulations (which contain no "reservatory clause) been assumed as the value of the land sued for, and "regulated the distribution of civil suits for land to the different "indicatories." The 2nd Judge observes that "it is long since that the Government determined that the public revenue in Malabar should not exceed six-tenths of the Patom or the Proprietor's rent" and he concludes this part of the subject by remarking that "taking the average of 14 different rates of proportion five-tenths may be computed to be the average proportion which the public assessment bears to the proprietor's annual rent produce in Canara and Malabar."

12. The 2nd Judge then notices a custom observed in Malabar by the operation of which a mortgage on land is cleared off in the course of 60 years merely by renewal of the mortgage deed after every 12 years, when a deduction is made of 20 per cent from the mortgage amount. This peculiarity, he remarks, gives a value to the land in Malabar not easily to be estimated ; that hence land is a species of property in that division, "which from the strong attachment for it borne universally by all the inhabitants requires to be scrupulously regarded and protected by the legislature" and ought not in his opinion to be disposable in litigation by the judgment of any court without an appeal.

13. With regard to the most accurate mode of valuing land in the Western Division the 2nd Judge proposes in the minute under consideration "that it be taken at not less than 25 years of the annual income, derivable to the proprietor from the entire produce after deducting the charges of management and the public assessment, whatever that may be ; for which purpose it will only require to be enacted that in all suits for land the plaint shall specify the proprietor's rent produce, and the public

assessment payable to the Government by the deduction of which from the rent produce, the residue multiplied by 25 will be the estimated value. The more the assessment the less will be the value of the land to the proprietor and vice versa, multiplying either by 25 brings both relatively to the same value."

14. In the communication from the Provincial Court dated 19th January last, the proposition for rescinding the clause which renders certain decisions of District Munsifs in claims for landed property unappealable is renewed and it is observed, that according to the value of land as assumed by them a District Munsif can decree land amounting in real value to Rs. 5,000.

15. It appears to be the manifest intention of the regulations to establish, as far as may be, an uniform standard of the value of all descriptions of property, by reference to which the jurisdiction of the several courts is to be determined.

16. It appears by the note in Mr. Harrington's work, to which reference has been made above, that in determining the extent of the final jurisdiction of the Zilla and Provincial Courts in Bengal "the general valuation of lands was a ten years' purchase of the annual profit derivable from them"; and accordingly by Section XXI, Bengal Regulation II of 1803, which determined the final jurisdiction of the Zilla Courts, land or other real property exempted from the payment of revenue the annual produce of which should not exceed Rs. 20 and land paying revenue to Government the annual produce of which might not exceed Rs. 200, were estimated as equivalent in value to a sum of money or other real or personal property, the amount value of which should be Rs. 200. The same scale of valuation is observed in clause first Section X, Bengal Regulation V of 1803, which determined the final jurisdiction of the Provincial Courts of appeal; Lakhiraj land of Rs. 500 and Malguzary land of Rs. 5,000 annual produce being estimated as worth Rs. 5,000.

17. The provisions originally enacted in the Madras Code of Regulations for determining the final jurisdiction of the Zilla and Provincial Courts exhibit a remarkable variance from this standard of the value of land; for while in section XXI, Regulation II of 1802, and clause first Section XXX, Regulation IV of 1802, the value of Lakhiraj land is taken to bear the same proportion to that of Malguzary land, as in Bengal (which as above stated was founded on the assumption that "the proportion of the public assessment to the rent produce of lands subject thereto was nine-tenths of the entire rents of each estate") in the Madras Code Lakhiraj land yielding Rs. 20 annual produce and Malguzary land of Rs. 200 annual produce, were taken as worth Rs. 1,000 and Lakhiraj land of Rs. 100 annual produce, and Malguzary land of Rs. 1,000 annual produce, were taken as worth Rs. 5,000; or according to the above data land here was estimated at 50 years' purchase of the annual profit derivable to the proprietor, while in Bengal it was rated at 10 years' purchase.

18. The grounds on which this estimate of the value of land in the provinces under this Presidency was formed, are unknown to the Judges of the Sadr Adalut; and would indeed appear to have been overlooked by the legislature upon the occasion of enacting Regulation XII of 1809 (adopted from Bengal Regulation XIII of 1808) in Section II of which Regulation the relative value of land, and other descriptions of property is stated, as estimated in the Bengal Code, and not in that of Madras, Lakhiraj land of Rs. 500 annual produce and Malguzary land of Rs. 5,000 annual produce being taken as equivalent in value to a house, garden or any other description of immoveable property, the computed value of which might be Rs. 5,000 or to money, effects or other moveable property the amount or value of which might be Rs. 5,000.

19. It is foreign to the object of the present discussion to enquire how it happened, that in 1809 so different an estimate of the general value of

land should have been formed in determining the jurisdiction of the Zilla and Provincial Courts from that adopted in 1802; a reference to Section VI, Regulation XII of 1802, would indeed almost induce the belief, that some mistake had occurred in printing Section XXI, Regulation II, Section XXX, Regulation IV, and Section X, Regulation V of 1802. The standard, established in 1809, having been ever since maintained as in Sections XI and XLIII, Regulation VI of 1816, and Sections II, III and IV, Regulation II of 1821, it remains to enquire how far it is correctly applicable to the actual state of things.

20. It appears, that the relative value of lands and other descriptions of property is estimated on the supposition, first that land is worth ten years' purchase of the annual profit derived from it to the holder; and secondly that the entire rent produce of Malguzary land for one year is equivalent to the proprietor's income for ten years.

21. It would, however, seem that this estimate is incorrect in both particulars; that the public assessment does not generally, if anywhere, amount to nine-tenths of the entire rent of each estate after deducting the charges of management; and that the valuation of land at ten years' purchase of the annual profit derived from it is not generally, if anywhere, accurate.

22. It is stated in the communications under consideration from the Provincial Court in the Western division, that in Malabar land is worth 25 years' purchase of the annual profit derived to the holder; and the proportion which the public assessment bears to the entire rent is stated at 5/10ths.

23. Supposing these data to be correct, Lakhiraj land in Malabar of 2 rupees annual produce, the limit of the final jurisdiction of a District Munsif under the provisions of Section XLIII, Regulation VI of 1816, is equal in value to a house, garden or personal effects, worth Rs. 50 and Malguzary land of Rs. 20 annual produce is in this province equal in value to Lakhiraj land of Rs. 10 annual produce, and to other descriptions of property worth Rs. 250 to which extent the final jurisdiction of District Munsifs in Malabar in suits for land is consequently raised.

24. In respect to the general valuation of the relative value of land and other descriptions of property, whereby the jurisdiction of the courts is determined, it is clear that if the data on which the estimate was formed be erroneous, the value of suits is now determined in a manner inconsistent with the intentions of the legislature in fixing it.

25. For instance it is clearly intended by the provisions of Section II, Regulation XII of 1809, to give the Zilla Courts jurisdiction in cases where the value of the cause of action may be Rs. 5,000; but in a district, where land may be worth 20 years' purchase of the net annual income derived to the holder, Lakhiraj land of Rs. 500 annual produce is worth Rs. 10,000 and when the public assessment may not exceed 5/10ths of the entire rent Malguzary land of Rs. 5,000 annual produce will equal in value Lakhiraj land, yielding annually Rs. 2,500, and other descriptions of property to the amount of Rs. 50,000.

26. The Judges of the Sadr Adalut observe that in Bengal the mode of estimating the value of suits for land, which still obtains in the territories subject to this presidency, has long been abandoned. By Section VIII, Bengal Regulation I of 1801, it was declared, in modification of Section III, Regulation IV of 1793, corresponding with Section III, Regulation III of 1802, in the Madras Code, that by the actual produce of land estates was intended "the net annual rent or other net produce receivable by the proprietor after deducting from the gross rent or other gross produce the actual expense of cultivation and other usual charges of management."

27. Neither the gross nor the net produce is, however, now established as the standard of valuation for Malguzary land, constituting an

entire estate, distinctly assessed or a specific proportion of such estate and in respect to Lakhiraj land the valuation has been raised from 10 to 18 times the amount of the annual produce.

28. By clause first Section XIV, Regulation I of 1814, it is prescribed, that "in suits for land paying revenue to Government the value of the property shall be assumed in the ceded and conquered provinces including Cuttack, at the amount of the annual Jumma payable on account of the land in question to Government, and in the provinces of Bengal, Behar, Benares and Orissa, excepting Cuttack as already noticed at three times the amount of the annual Jumma payable on account of the land to Government."

29. Clause second declares that "in suits for land exempt from the payment of the public revenue to Government the value of the property shall be assumed throughout the country, at 18 times the amount of the computed annual produce of the land."

30. In Section XXIII, Bengal Regulation XXVI of 1814, it is explained, that "the valuation of land paying revenue to Government as assumed in clause first Section XIV, Regulation I of 1814, being applicable only to entire estates distinctly assessed, or to specific proportion of such estates," in suits "for Malguzary land not constituting an entire estate, or a specific portion of such estate the value of the land claimed is to be assumed and estimated according to clause third Section XIV, Regulation I of 1814," which clause retains the rule in this respect provided in Section III, Regulation IV of 1793, and Section III, Regulation III of 1803, in the Bengal Code, which correspond with Section III, Regulation III of 1802, in the code of this presidency.

31. Referring to Section XXIII, Regulation XXVI of 1814, above quoted it is explained in Section V, Bengal Regulation XIX of 1817, that "a doubt having been entertained in what manner the rule cited in clause" third Section XIV, Regulation I of 1814, "from Section III, Regulation IV of 1793, and Section III, Regulation III of 1803, should be applied to the valuation of Malguzary lands, not distinctly assessed for the public revenue in some cases; particularly in boundary disputes when the judgment for or against the plaintiff may not occasion any alteration in the public assessment," in all claims "to a right of property or to a permanent tenure of any description in Malguzary land, not constituting an entire estate, distinctly assessed with a Sad Jumma payable to Government or a specific proportion of such estate, so as to come within the rule prescribed in clause first Section XIV, Regulation I of 1814, the value of the land sued for is to be assumed at its computed annual rent produce, as described in Section III, Regulation IV of 1793, and Section III, Regulation III of 1803. If the suit be not for a right of property, or for a permanent tenure but for a farm lease-hold of any denomination, during a limited term or for any interest in the land during a limited period, the valuation of the plaintiff's claim in pursuance of the Regulations above mentioned is to be made according to the nearest estimate, that can be formed of the actual value of the thing sued for; or if the suit be for damages, the amount in which the plaintiff is indamaged."

32. The Judges of the Sadr Adalut have quoted the rules now in force for estimating the value of suits for land in the territories, immediately subject to the superior presidency, for the purpose of showing that the standard originally established which has been observed in these territories since the promulgation of Regulation XII of 1809, has been completely abandoned; land exempt from the payment of revenue being valued at 18 times the annual produce instead of 10 and the value of Malguzary land being fixed in different provinces with reference to local circumstances.

33. It is presumed that the Government are now in possession of data sufficiently authentic to warrant the introduction of some such rules for the valuation of suits for land in the territories under this presidency.

34. The incorrectness of the valuation now observed appears to be sufficiently manifest and the consequent necessity of an alteration of the law in this respect with the view of bringing both description of lands "within the standard fixed for hearing and deciding suits for all other "real property and for personal property."

35. The Judges of the Sadr Adalut have availed themselves of this occasion to submit their opinion upon the general question. With reference particularly to the question of the expediency of allowing to District Munsifs any jurisdiction without appeal in suits for land the Judges entirely concur with the Provincial Court in the Western Division, that the rule in this respect contained in section XLIII, Regulation VI of 1816, is impolitic and dangerous.

36. As connected with the question of the policy of giving to these officers jurisdiction in any case without appeal, the Judges of Sadr Adalut submit a letter dated 8th October last, from the Provincial Court of Appeal in the Northern Division with the communication therein mentioned from the Judge in the Zilla of Nellore.

37. It is true that for unwarranted acts of authority a District Munsif is liable under clause first Section VIII, Regulation VI of 1816, to an action for damages. This mode of seeking redress must, however, be attended with expense and delay ; and it appears to the Judges of the Sadr Udalut that the only effectual mode of guarding against acts of injustice and irregularity on the part of these officers will be by rendering all their decisions appealable to the Zilla Courts or by the adoption of the rules in this respect recommended in the letter of the Sadr Court to Government, dated 31st May 1821.

I have the honor to be,
Sir,
Your most obedient servant,
W. HUDLESTON,
Register.

SADR ADALUT,
REGISTER'S OFFICE,
23rd June 1825.

ENCLOSURES.

PROVINCIAL COURT. WESTERN DIVISION.

To
THE REGISTRAR TO THE
SADR ADALUT.

SIR,

I am directed to transmit to you to be laid before the Judges of the Sadr Adalut, the accompanying copy of a minute which has been recorded by the Second Judge on the subject of your letter dated 24th January last and in which the first judge has concurred.

I have the honor to be,
Sir,
Your most obedient servant,
W. B. ANDERSON,
Register, Western Division.

TELLICHERRY REGISTER'S OFFICE,
21st December 1824.

PROVINCIAL COURT. WESTERN DIVISION.

Minute recorded by the Second Judge.

Under date the 24th of January last the Sadr Udalut called upon us for information respecting the mode in which the annual produce of land is estimated by the courts in this division preparatory to submitting for the consideration of Government, the questions which arose from the reference made by this court under date the 25th May 1821 on the danger of allowing to District Munsif's jurisdiction without appeal in suits for land and the incorrectness of the mode which obtains of estimating the value of landed property.

The Sadr Court's letter explains the grounds on which the annual produce of Malguzary land was supposed to equal the value to the proprietor for ten years. It explains that the public assessment was taken to be in the proportion of nine-tenths of the entire rent produce after

deducting the charges of management and therefore the entire rent produce of Malguzary land for one year was considered equivalent to the proprietor's income for ten years after deducting the charges of management and the revenue payable to Government.

Adverting to this calculation as having regulated the mode prescribed in Section III Regulation III of 1802 for estimating the amount produce of land according to the explanation of it given in Mr. Harington's analyses, the Sadr Court remark that the correctness of estimating the value of land in this Division must obviously depend on the principle on which the annual produce is estimated and therefore it is on this point they require clear and precise information.

It is to be presumed from Mr. Harington's explanation that on framing the permanent settlement in Bengal the Government gave up to the Zemindars who were then established, one-tenth of the entire rent produce (after deducting the expenses of management) which had been previously collected as the public revenue and that the value of a Zemindary was estimated at ten years of such annual income of 1/10th of the entire net produce, after deducting the expenses of management. What remission was made of the Government rent in the few districts permanently settled under the Madras Presidency, I am not accurately informed, but if it exceeded the above proportion of 1/10th and I have reason to think it did in the settlement of the Salem district, the value of a Zemindary under this Presidency would be greater than under Bengal. But one of the professed objects of the permanent settlement was, by a fixed assessment to promote "the progress of agriculture, population and wealth" which had been obstructed by the previous system of unceasing inquisitions by the local officers of the ruling power to augment the public revenue. It is evident that this object of the Government could not be attained in a Zemindary fully cultivated and in which the public assessment absorbed so large a proportion of the rent produce as 9/10ths. But in all the Zemindaries there were considerable tracts of waste land which when brought into cultivation would yield its full rent to the Zemindar without subjecting him to any additional assessment and it was by the means of bringing waste lands into cultivation that the progress of agriculture, wealth and population was expected to arise. If I am correct in this conjecture the principle by which the value of land is estimated in the regulations, though justly applicable on the introduction of the permanent settlement must long ere this have ceased to be correct in the Zemindaries which have improved in value by extended cultivation. This seems to be a point deserving of the consideration of Government if any importance attach to that part of the existing regulations which limit the jurisdiction of the different courts, Native and European in the investigation and decision of civil suits.

The entire rent produce of land after deducting the charges of management is denominated in Canara by the general term of "Guenee", and in Malabar by "Paatom" and "Maarom". It constituted the proprietor's rent on which the revenue payable to the Govt. is assessed. In almost every suit instituted in the courts in this division and particularly in Canara, the proprietors' rent as well as the Government assessment is specified in the Title Deeds which generally form the grounds of action and though the Government assessment has been found to bear a less proportion than 9/10ths, the entire rent has, under a literal construction of the Regulations (which contain no reservatory clause) been assumed as the value of the land sued for, and regulated the distribution of civil suits for land to the different indicatories. It is long since that the Govt. determined that the public revenue in Malabar should not exceed 6/10ths. of the Patoom or proprietor's rent. In some estates it exceeds that proportion and in many more falls short of it. In point of fact the proportion may be said to vary in almost in every estate. This is unavoidable as it must always depend on the labour and attention that is bestowed on the cultivation and the difficulty that must be experienced in ascertaining the rent produce for revenue purposes. Taking however the average of the different rates of proportion five tenths * may be computed to be the average proportion which the public assessment bears to the proprietor's annual rent produce in Canara and Malabar.

The greater proportion of the lands both in Canara and Malabar are mortgaged for very considerable sums. This fact alone is sufficient evidence of the high estimation in which land is held. One peculiarity in the mortgage tenures in Malabar tends much to enhance its value. It is that the common mortgages are not only redeemable after any lapse of years, but the land itself in process of time is capable of redeeming its own mortgage, for after every 12 years a proprietor can claim a renewal of the mortgage bond on his estate provided it were granted by his predecessor, on which occasion, according to the established custom of the country, a deduction takes place of 20 per cent. from the mortgage amount. Thus in the course of 60 years a land may clear itself by such periodical renewals of the mortgage deed. This peculiarity prevails mostly in South

* NOTE.—The following rates of proportion from the given number, ten, are taken from suits which have been instituted in this court in which the landlord's rent & the Government. assessment are distinctly stated :—

In Malabar.	In Canara.

Average for Malabar & Canara ... 5.

Malabar and it requires but little consideration to perceive that it gives a value to the land not easily to be estimated. Hence, land is a species of property in this division which, from the strong attachment for it borne universally by all the inhabitants, requires to be scrupulously regarded and protected by the legislation and ought not, in my humble opinion, to be disposable in litigation by the judgment of any court without an appeal. It is the interest of the Government to keep up this attachment and not risk the diminution of it by placing it at the arbitrary disposal of a district munsiff.

I have already recorded the opinion that an appeal should be from all decisions of District Munsifs involving property in land and with regard to the most accurate mode of valuing land in this division, on the institution of suits determinable by the Judicial Courts, European and Native, I should propose that it be taken at not less than 25 years of the annual income derivable to the proprietor from the entire rent produce, after deducting the charges of management and the public assessment, whatever that may be; for which purpose, it will only require to be enacted that in all suits for land the plaint shall specify the proprietor's rent produce and the public assessment payable to the Government by the deduction of which from the rent produce the residue multiplied by 25 will be the estimated value. The more the assessment the less will be the value of the land to the proprietor and *vice versa* multiplying either by 25 bungs both relatively to the same value.

Register.

21st December 1824.

No. 371 J.D.

Extract from the Minutes of Consultation, dated 23rd September 1825.

Read letter from the Register to the Court of Sadr Adalut and its enclosures No. 252, dated 23rd June 1825.

No. 10.–Minute of the Govt.

1. The necessity of altering the rules at present in force for the valuation of land with reference to the respective jurisdictions of the several orders of civil tribunals, is the principal subject of the foregoing communication from the Court of Sader Adalut. In the judgment of the Governor in Council that necessity is fully established. The present rules assume that land exempt from payment of revenue is worth to the proprietor ten times the annual produce according to the definition of annual produce contained in Section III Regulation III of 1802 and no more; and that the value of land paying revenue to Government is the same with the produce for one year. These principles of estimation are not only so very incorrect as in general to give no approximation to the real value of land; but so far at least as regards lands subject to payment of revenue were evidently framed with an exclusive view to Zemindary or Talukdary tenure. Even with respect to Lakhiraj land the actual occupation and cultivation of the soil by the proprietor does not appear to have been contemplated as a possible contingency. The annual produce by which in one or other of the two ways above mentioned the value of all land is required to be determined, was "declared to be the aggregate of the sums that may have been paid under the regulations by the dependent talukdars, under-farmers and ryots, on account of the year in which the claim may be preferred and that would be payable by them were the claimant to be put into the possession of the lands during that year."

Section III, Regn. III of 1802.

2. It is evident that if this provision were taken in its literal sense and strictly observed, the rules in question could not be at all applied to lands in which there are no dependent talukdars, under-farmers, or ryots paying rent to the proprietor, but where on the contrary the proprietor is himself also the cultivator of the soil. It would appear, however, that

in such cases, the Courts, acting upon what they conceive to be the spirit of the provision, consider as the annual produce the net annual income accruing to the proprietor after deduction of all charges of cultivation or management.

3. The general result of these rules, as has already been observed, is an extremely incorrect valuation of land. This is the case even with respect to land held on Zemindary tenure. But with respect to other kinds of property in land, the results differ still more widely from the truth. In the provinces of Malabar and Canara, where the state of landed property is peculiar, this erroneous mode of estimating it gives the inferior judicature an extent of jurisdiction greatly exceeding what was ever intended or contemplated by the Government. It is stated in paragraph 7 of letter from Sader Adalut, that in Malabar the public assessment is on an average about one half of the whole rent; and that land is worth from 20 to 40 years' purchase of the income which it yields to the proprietor. Assuming the proportion of the assessment to be, as stated, one half, and the value of land to be twenty five years' purchase, a District Munsif may adjudicate finally Lakhiraj land of the value of 50 rupees and Malguzary land of the value of 250 rupees, while he cannot pass a final decision with respect to personal property exceeding in amount or value twenty rupees; and his primary jurisdiction, though limited in the case of personal property to 200 rupees, extends to property in Lakhiraj land worth 500 and in Malguzary land worth 2,500 rupees. The jurisdiction of each of the other orders of tribunals over land is of course extended in the same proportion beyond that assigned to them over money or other personal property.

4. The rules for valuing land, to the operation of which these remarks relate, appear to have been taken from the Bengal Code. But it also appears that at that Presidency they have long been repealed; and that Lakhiraj land is now valued at 18 times the annual produce instead of ten times, while for valuing Malguzary land different rules are prescribed for different provinces with reference to local circumstances. The Sader Adalut have stated what those rules are; and have suggested the expediency of establishing some such rules for the territories subject to this Presidency.

5. The Second Judge of the Provincial Court for the Western Division in a Minute which has obtained the concurrence of the First Judge, proposes as the most accurate mode of valuing land in that division, "that it be taken at not less than twenty-five years' purchase of the annual income derivable to the proprietor from the entire produce after deducting the charges of management and the public assessment". For the purpose of establishing it, he observes that it will only require to be enacted that in all suits for land the plaint shall specify "the proprietor's rent produce" and the public assessment payable out of it; and that, the latter being deducted from the former, the remainder multiplied by 25 shall be the estimated value. By the rent produce it is evidently meant the annual income accruing to the proprietor from the whole produce, exclusive of the charges of management but inclusive of the public assessment.

6. A different suggestion was on a former occasion offered by the late Third Judge of the Western Provincial Court (Mr. Baber) and was concurred in by the Second Judge (Mr. Warden). It was, in substance, that there should be no special rule for the valuation of land but that the value of land forming a subject of litigation should be determined in the same manner as that of property of any other kind.

7. It is evident that any rule, by which it is assumed, that the value of property in land bears a fixed and uniform proportion either to the whole crop produce or to any of the shares into which that produce comes to be divided, cannot always give accurate results. The Governor in Council is, however, inclined to be of opinion that if the rule apply to an extensive class of cases, and afford in all of them a tolerable approximation

to the true value, the effect of it will be upon the whole beneficial. Perfect accuracy in this matter is not required and if the field of dispute respecting jurisdiction is narrowed, an advantage of some importance is gained. This, it appears to the Government, would be the case, if it were settled that a certain number of years' purchase of the clear income yielded by the litigated property should be regarded as its value, and the amount of that income were alone left to be determined in the same manner in which the value of personal property is determined under the Regulations in force. In framing any rules, however, upon this subject, attention would require to be given to all the various kinds of property in land which are liable to be made the subject of litigation before the tribunals established in the territories of this Presidency, as well as to the variety which has place in the value of land in different provinces.

8. As the Board of Revenue may be presumed to possess the best information upon these points, it is resolved before proceeding farther upon this subject to refer it to them for their consideration and report. With this view so much of the letter above recorded from the Register to the Sadr Adalut as relates to the judicial valuation of land together with these observations of the Government will be communicated to that Board.

9. Two other questions are also discussed in the same communication from the Sadr Adalut. One is whether an appeal from the decisions of District Munsifs ought not to be allowed in all suits for property in land. The other is whether the decisions of District Munsifs ought not to be rendered subject to revision in all cases, whatever be the value or the nature of the property adjudicated.

10. The Governor in Council adheres to the opinion, which was formerly recorded by the Government and communicated to the Sadr Adalut, that to render the decrees of District Munsifs for property not exceeding in value 20 rupees, generally open to revision, might interfere materially with the beneficial operation of the regulation under which those officers act, and that it would be inexpedient to introduce so important a change into the provisions which were established by that regulation on the alleged ground of partial evil. But the Governor in Council thinks that the same objection does not hold with any considerable force, against allowing an appeal from the decisions of District Munsifs in all suits for property in land; and that sufficient ground has been shown for considering it advisable to modify the provisions of Regulation VI of 1816 to this extent. The Sadr Adalut will therefore be instructed to prepare and submit in the most convenient form a draft of the requisite enactment.

d/ 29th June 1821—No. 240.

Ordered that a copy of the foregoing Minute be transmitted to the Register to the Sadr Adalut for the information and guidance of that court.

SECTION B

LETTER FROM THE BOARD OF REVENUE TO COLLECTORS CALLING FOR INFORMATION REGARDING THE VALUE OF LAND AND SELECTIONS FROM THE REPLIES OF COLLECTORS THERETO.

* *Letter dated 16th February 1826 from the Secretary to the Board of Revenue to all Collectors calling for information regarding the value of land.*

Letter—from the Collector of Trichinopoly.
To—the Secretary to the Board of Revenue.
Dated—31st March 1826.
No.—590.

SIR,

I have the honor to acknowledge the receipt of your letter of the 16th ultimo calling upon me for information about the value of land and the rate at which it is generally sold in this district.

2. The only lands in this district which are assessed in perpetuity with a fixed revenue under Regulation XXV of 1802, are the villages that were granted to the Zemindars of Tennore, Woodiarpollum and Arialore under a Sunnud i Milkout Istimorar dated 23rd of December 1817, but none of the lands attached to these Zemindaries have been transferred or sold. The annual assessment fixed upon them is Pagodas 575.

3. The value of private estates, farms and fields or a share in an entire village meerassy held by ryots and assessed with a revenue payable direct to the collector, varies very much. It depends on the nature of the soil and the description and quantity of grain that it bears, on whether Pullars or agricultural servants are or are not attached to it, and in a great measure in the price of grain, the circumstances of the owner and the necessity which he is under of parting with it at the time that it is disposed of. In faslis 1228–29 and 30 when the price of grain was very low, land was sold for Rs. 100 which would not be parted with now for 100 pagodas and the produce of a Cawny of Nunja land varies from ten to thirty five culloms.

4. In favourable seasons and when a fair price is produced for grain, land of the above mentioned description generally sells for from 8 to 16 years' purchase of the net annual income derived from it, but at other times when the price of grain has been very low it has been sold for four years and sometimes when the owner has been in distress, at between two and three years' purchase of the net produce.

5. It is not the custom, however, in this district for the person who sells the land to value it at so many years' purchase of the income that he draws from it, but the purchaser in making the bargain calculates on deriving so much from the produce of the land, after deducting all expenses as he would get from the money he is to pay for it, if it were laid out for interest at 12 per cent. per annum, the terms of the agreement being still dependant on the circumstances mentioned in the third paragraph of this letter.

6. There are no Jagheers in this district. The Shrotriumdars receive the fixed share of the produce that is allotted to them from the Meerassidars who pay the expenses of cultivation and are considered the proprietors of the soil. Land in the Shrotrium villages which are only 45 in number, generally sells from 14 to 22 years' purchase of the net produce derived from it by the Meerassidars but the sales have been very few and the extent of land not great.

7. The only villages that are exempt from payment of revenue are the Inam villages which were granted during the time of the Nabobs but they are not considered saleable as they may be resumed.

* Not printed.

8. There are very few Inam lands or fields in the district, not forming an entire village and paying a quit rent to Government. What these are, are called Peropoo Maniums. From the accounts that I have procured of the few sales of land of that description, it appears that it has been disposed of for between 8 and 10 years' purchase. In one instance much lower.

9. The Inamdar to whom a small portion of land has been granted on Inam tenure is not held to be the owner of it, but he receives the share of the produce that is allotted to him from the Meerassidar who pays the expenses of cultivation and is considered to be the proprietor of the land. Inam land when sold by the Meerassidar is disposed of in general for from 8 to 14 years' of the net income which he derives from it.

10. The only lands in the dry taluks which are ever sold are those which belong to the Brahmins and to the Meerassidars of Wolcondah. In the rest of that part of the district the ryots are poor, cultivate a small extent of land each, and are not considered to have any proprietory right in it. The greater part of the saleable lands are the property of the Meerassidars and Brahmins, and it would appear by the accounts that I have procured of sales that the average value of their landed property may be considered to be about 12 years' purchase of the net annual income that they derive from it except when the price of grain is very low.

I have the honour to be,
Sir,
Your most obedient servant,
G. W. SAUNDERS,
Collector.

Letter—from the Collector of Guntur.
To—the President and Members of the Board of Revenue, Fort St. George.
Dated—4/7th April 1826.
No.—604 D.E.

GENTLEMEN,

Para. *1st.* With reference to Mr. Secretary Dent's letter of the 16th February last, I have the honour to state that no lands of whatever description in this District are usually bought and sold either publicly or by private contract, I find it therefore a matter of difficulty to collect any accounts or information which would enable me to ascertain with any accuracy the value in sale of the different lands of the several descriptions in this District. I would however beg to be permitted to state my opinion, which has been formed from a general knowledge on the subject, of the several cases as in order proposed.—

In the *first* place, if the land is a Zemindary or a portion of a Zemindary assessed in perpetuity with a fixed revenue under Regulation XXV of 1802, it would sell for six-fold of the clear net annual income yeilded to the Proprietor.

2dly. The lands described in the second case proposed in the letter under reply are not considered saleable in this District, but I imagine will be tolerably correctly given at between 2 and 3 fold the net annual profit derived from it. It is necessary however to state that there is no such thing in this District, as "an entire village Meerassy held by a Ryot". Nor in fact any Meerassy in the present days save and except that of Curnums and under village servants and which are of various kinds and extent.

3dly. If the land is an entire village such as a Shrotrium etc. paying a small quit rent, it would sell for eight-fold of the clear net annual income yeilded to the proprietor. It is here proper to observe that when land of

villages is subject to the payment of any revenue the term Jaghire is not in use in this District but they are called either Aggraharum village, Mokhausa D^{o}., Manooverty D^{o}., or Cuttoobady D^{o}.

4thly. If the land is a Jaghire or entire village exempt from the payment of all revenue, it would sell for twelve-fold of the clear net annual income yeilded to the proprietor. Such land is also denominated Surva Aggraharam and Surua Mokhausa depending on the occasion for which and the sect of the person to whom granted.

5thly. If the land is an Inam or certain lands or fields not extending to an entire village paying small quit rent, it would sell for eight-fold of the clear net annual income yeilded to the proprietor. The land not extending to an entire village is called Khundreca in this District.

6thly. If the land is of the above description but exempted from the payment of all revenues it would sell for twelve-fold of the clear net annual income to the proprietor—such lands are termed Surva Doombalah Inams and Mauniums.

2*d*. In conclusion I beg to inform your Board that there is not any other description of landed property in this District which is not included in the foregoing.

I have the honour to be
with much respect,
Gentlemen,
Your most obedient servant,
(Sd.) J. C. WHISH,
Collector.

GUNTUR ZILLAH
CHINNA GANJAM
4th April 1826.

Letter—from the Principal Collector of Malabar.
To—the President and Members of the Board of Revenue.
Dated—5th April 1826.
No.—632.

GENTLEMEN,

With reference to Mr. Secretary Dent's letter under date the 16th February last, desiring me to endeavour to ascertain and report for how many fold of the clear net annual income yielded to the possessor land in this district generally sells, I have the honor to state that the only cases therein specified which apply to this Province are Nos. 2, 5 & 6 and to submit to your Board the accompanying statement containing the information called for, which has been obtained from the several Tahsildars.

2. For fuller and more complete, as well as I am inclined to believe, more correct information on this subject, I beg leave to refer your Board under date 16th June 1813 to paragraphs 82 to 85 of Mr. Warden's report respecting the average price of land in different parts of this Province and to the statements which accompanied it; the latter show the average price of land in every Hobly, whilst the returns received from the Tahsildars exhibit the average price in each Taluk.

3. The causes of the great difference in the prices of garden and rice lands throughout this Province, are explained by Mr. Warden in paragraph 85 of the report above referred to.

I have the honor to be,
Gentlemen,
Your most obedient servant,
JAMES VAUGHAN,
Principal Collector.

Statement showing for how many fold of the clear net annual income yielded to the possessor, land in the Province of Malabar, generally sells according to the returns made to the acting Principal Collector by the Tahsildars—cont.

Letter—from the Collector of Tinnevelly,
To—the President and Members of the Board of Revenue,
Dated—10th April 1826,
No.—653.

GENTLEMEN,

I have the honor to reply to your letter of the 16th February last the object of which is to obtain such information as will furnish the Courts of Justice with a more correct rule for estimating the value of landed property when it becomes the subject of litigation.

1st case.—No instance is known in Tinnevelly of the sale of a Zemindary; and only one, of a portion of a Zemindary; but as the revenue of the portion sold cannot be ascertained, one of the most essential data is wanting.

2nd case.—Will be subsequently considered.

3rd case.—Only one instance is known of the sale of a quit rent village, but the data obtained are inconsistent with each other–the revenues of the land being represented as less than the rent.

4th, 5th, and 6th cases.—No examples can be found in illustration of either of these cases.

Case 2.—In order to answer this case to any good effect, the four following distinctions should be observed and they are such as will easily be ascertained by a Court, because the plaintiff and defendant will readily concur in supporting them.

Is the land in dispute [1] two crop Nunja–or [2] one crop Nunja–or [3] poonja–or is it a [4] share of a village in which both descriptions of land are comprehended.

For the first description of land, it seems to me that the selling value is equal to about fifteen fold the net annual income of the owner–though this is merely an approximation; the best two crop land is cheaper than the worst bearing the same number of crops; as for example—

	Selling value			Owners net income.			
	RS.	AS.	PS.	RS.	AS.	PS.	
Two crop Nunja—							
1st kind							
1 cottah ...	525	0	0	44	11	3	11 fold
last kind							
1 cottah ...	97	8	0	4	3	8	20 fold

and in the present unsettled state of the Tinnevelly Nunja lands a more correct estimate cannot be formed as the lands are not classed or assessed.

In one crop Nunja the selling value seems (by a calculation similar to that given above) to be twelve fold the net annual income, to the owner.

Poonja alone, sells for twelve fold the net annual income to the owner. Nunja and Poonja sold together go for twelve fold the net annual income.

I am aware that this latter statement seems not exactly reconcilable with the value assigned to Nunja and Poonja separately; but the whole question is full of intricacy–in as much as the caprice of the purchaser or embarrassments of the seller tend materially to make a difference between the intrinsic value of land calculated on its productive qualities, and the accidental value which it may acquire by situation or other extrinsic cause.

I have the honor to be,
Gentlemen,
Your most obedient servant,
J. MONRO,
Collector.

Letter—from the Collector of Nellore.
To—the President and Members of the Board of Revenue.
Dated—10th April 1826.
No.—626.

GENTLEMEN,

I have the honor to acknowledge the receipt of your Secretary's letter of the 16th of February relative to the value of land in this district.

2. Sales of land do not appear to have been common here and when sales are infrequent it is difficult to draw any conclusion, because the purchase may have been made from particular motives.

3. There is but one instance of the sale of a Zemindary, namely, that of Sydapoorum. It was purchased by Mulrauze Vencata Goondarow for Rs. 70,000 which he bid at auction immediately it was put up and there were no other bidders. I suppose the reason to have been that it belonged to his family. Taking the average of three years' income and expenditure the price which was paid by M. Vencata Goondarow was forty years' purchase. Even supposing that under the vigilant eye of the Zemindar the collections would have been something greater and the expense something less than under the Collector's management, the price was far beyond the value. I recollect in Rajahmundry to have sold one of the best of the Seddepore estates for 5 years' purchase as far as it could be ascertained and it was thought the purchaser had paid too much.

4. Survah Inam villages have been sold by the Zillah Court for ten years' purchase and the same price has been obtained by private bargain; but sometimes less has been given, so that I consider this is the outside value.

5. The sale value of shrotriums and Cundregahs (portions of land with a fixed favourable assessment) I have found it difficult to trace. There are three instances of sales effected for 35, 20 and 14 years' purchase. Another was sold for $4\frac{2}{3}$ years' purchase. This last I think comes nearest the average value. It is difficult to ascertain the exact value in the generality of cases but shrotriums or Cundregahs have been sold for a sum supposed to be equal to only 2 or 3 years' purchase.

6. There are many motives which would now weigh with a native in the purchase of land besides the amount of income to be derived from the capital expended. But if the sale of land was common it would be easy to judge of the average value. Whilst the ordinary interest of money amongst natives and upon mortgage is as high as 12 per cent. I should think that the value of Surva Inam land would not exceed 12 years' purchase. The value of Shrotriums or portions of land paying a fixed tax will be less because although the payment cannot be increased, it must not be delayed and subjects the landholder to the visits of the Collector's officers. The value of large Zemindaries will be still less because the number of purchasers will be much less and the risk and trouble greater. The situation also will make a difference whether it be in a secure or insecure place, and whether healthy or unhealthy.

7. As far as I am able to judge I should think that the value in a general way might be quoted for Surva Inams 10 years' purchase, Shrotriums 4 years and Zemindaries three years. I shall endeavour at leisure to procure fuller and better information on the subject.

I have the honor to be,
Gentlemen,
Your most obedient servant,

E. SMALLEY,
Collector.

Letter—from the Collector of Ganjam.
To—the President and Members of the Board of Revenue.
Dated—13th April 1826.
No.—666.

GENTLEMEN,

I have the honour to acknowledge the receipt of Mr. Secretary Dent's letter and enclosure of the 16th ultimo and to state for the information of your Board that since I came to this district no ancient Zemindaries or proprietory taluks have been sold except 3 estates as per enclosed statement, the average collections of which, as inserted in column 9 of the enclosed account, was taken from the Khawm accounts furnished by the Curnums by which it will appear that the gross produce of these estates (after deducting the ryots share) is not sufficient to meet the Circar demand; but these estates were transferred to several individuals as explained in my letter and enclosure of the 1st August last and from enquiry I am given to understand a large portion of uncultivated lands exist and the purchasers have paid high with hopes to get all the waste lands cultivated but they have failed from the great difficulty of getting ryots and water. I have reason to believe that the Curnums in this district never keep any correct accounts. From enquiries I am led to think the private purchasers give an enormous per cent. on the Circar Jummah although by accounts furnished by Curnums it is impossible to ascertain the net profit derived, and I can secure no satisfactory data to say how many fold of the clear net annual income of these estates came to their possessors.

With respect to the ancient Zemindaries I have the honour to state that no private sales or transfers have taken place in the district. I find some Taluks were partly sold in my predecessors' time but it will be difficult to procure any correct Khawm accounts from the Curnums of these Uodia taluks, without which the clear profits to the Zemindars cannot be ascertained. However, I beg leave to enclose a statement with remarks which shows the sales were nominal, existed only *pro tempore*, and the lands by Circar influence and arrangement ultimately restored to the ancient Zemindars as requisite to secure the revenue and tranquillity of this Province.

The Jagheers and Agraharam lands paying cuttoobuddy to the Circar have sold as follows, as I can learn from local enquiry :—

1*st*. Those lands yielding the holder a good profit and watered from a river will fetch 8 years purchase.

2*nd*. Lands although of a good profit watered by tanks will secure 6 years purchase.

3*rd*. Lands to which no tanks or river afford water will barely get 3 or 4 years purchase.

The Jagheers and Agraharams exempt from the payment of revenue are said to have sold as follows :—

The 1st sort	as above	at about 10 years	purchase.
The 2nd	do.	do.	do.
The 3rd	do.	at 5 years	do.

The Inam lands situated in a Jerayettee village paying cuttoobuddy to the Circar may be taken as follows :—

The 1st sort	as above	at about	7 years	purchase.
The 2nd	do.	do.	4	do.
The 3rd	do.	do.	3	do.

The Inam lands situated in a Jerayettee village exempt from cuttoobuddy to the Circar may be taken as follows :—

The 1st sort	as above	at about	8 years	purchase.
The 2nd	do.	do.	6	do.
The 3rd	do.	do.	4	do.

In giving the foregoing information I beg to say the peculiar situation of the district precludes the local authorities from being able to secure any accurate data to go upon. The moment any question for information in the interior of this Province is started, the Hill Rajahs and Zemindars are persuaded to do and act as believing something is intended to encroach upon their rights such as they conceive them to exist. The road to enquiry is altogether shut or subverted in such a manner that nothing can be depended upon even if the Curnums were more able and correct in their office than they are.

I have the honor to be,
Gentlemen,
Your most obedient servant,
P. R. CAZALET,
Collector.

Letter—from the Principal Collector of Tanjore,
To—the President and Members of the Board of Revenue, Fort St. George,
Dated—14th April 1826.
No.—662.

GENTLEMEN,

Para 1st. On the subject of your Secretary's letter of the 16th February last, and its Enclosure, I have the honor now to state that there are only three descriptions of land in this District, of which, for the object Government have in view, it appears necessary to have the value correctly defined, all lands held and enjoyed on Tenures, otherwise designated, coming under one or other of these descriptions, and the same valuation ; and having attentively considered the returns made by the Tasildars, and the information, I have been able to collect from persons in my own Cutcherry, I beg to submit the following as the result of my enquiries :—

2. The descriptions of land I allude to, are as follows :—

1st. Lackhiraj, or Survamannium, as it is called in Tanjore, the value of which I calculate at 20 years' purchase, or 20 fold of the net annual income to the proprietor, deducting all charges.

2nd. Malguzary, or Turruff as it is here called, paying a full revenue to Government, the value of which may be stated at 10 years' purchase, or ten fold of the net annual income, yielded to the proprietor.

3rd. Shrotrium which is land permanently assessed with a favourable quit rent, and which may be reckoned in value at 8 years' purchase, or 8 fold the net annual income to the possessor.

3. With this information I may add that land in the last three or four years, has greatly risen in value in Tanjore, and is becoming now difficult of purchase.

I have the honor to be,
Gentlemen,
Your most obedient humble servant,
(Sd.) J. COTTON,
Principal Collector.

TANJORE,
NEGAPATAM,
14th April 1826.

Letter—from the Collector of Masulipatam,
To—the President and Members of the Board of Revenue,
Dated—21st April 1826.
No.—712.

GENTLEMEN,

Para 1. I have the honor to acknowledge the receipt of your secretary's letter under date the 16th of February last transmitting enclosed a Minute of Council, and desiring me to report relative to it, in how many fold of the clear net annual income yielded to the possessor, land generally sells in particular cases, in this district.

2. Prior to entering immediately upon the subject submitted, which has reference more particularly to the value of land at the present moment, it may be desirable to ascertain the value which formerly attached to lands when the Havalies were disposed of by the Government and thence by comparison with subsequent sales to arrive with greater accuracy to the actual advantages which landholders have derived from such purchases, and deduce from them if possible, such foundation for the establishment of a system that may prescribe the value of landed tenure as the peculiar circumstances of each description of property may suggest.

3. The first enclosure is a statement of the Circar Havalie lands disposed of in Faslis 1212 & 1216.

4. It was a principle observed in the formation of Zemindary Estates, that the Peishcush should be calculated at two-thirds of the gross revenue, but in the account now under inspection it will be observed that the amount of Peishcush not only exceeded that proportion in every instance, but in some, actually exceeded the estimated average annual gross revenue, thus though the Revenue of the 10 villages of the Vulloor samut was estimated at Rs. 17,955 the Peishcush was fixed at 21,000 rupees. In the same manner the estimated average annual gross revenue of the 14 villages of Megoodroo was 4,933 rupees, and the Peishcush upon it Rupees 6,300. The cause of this enhanced value of the Circar share, may be attributed to the anticipated improvement of which the lands were susceptible. It has been necessary to make allusion to the circumstances in order that an explanation of the extraordinary difference in the rates at which these estates were sold might be afforded, the range having been from $7\frac{3}{4}$ fold of the clear net revenue, to 61,600 fold. It is also observable that with the exceptions of two other estates which were purchased at 11 fold of the net revenue, the remainder sold for considerably more than 20 fold, or 20 years purchase.

5. There being no correct accounts of the charges [for] collection of the Havalies extant, I have in finding the net revenue in each, calculated the expenditure at 5 per cent.

6. Enclosure 2 exhibits the value which different descriptions of landed tenure have at more recent periods produced at public and private sales ; this statement being inevitably complex, requires some explanation. Columns Nos. 11, 12 & 13 under the head of collections, develope the average of the Circuit Committee upon which the Peishcush was formed, the average collections when the sub-divisions were disposed of by public sale, and the average collections of the last five years prepared for similar purposes during the current fasli ; the two first of these columns 11 & 12 are connected with the sales of the land and column 13 is inserted for the purpose of exhibiting the result of those sales.

7. The two first Purganahs in this account were disposed of by public auction in the Collector's Cutcherry, on account of arrears of Peishcush ; it will be seen that the average of the Committee considerably exceeded the subsequent collections, and that, at an after-period the revenue of the first of these Purganahs which was purchased at $24,937\frac{1}{2}$ fold of the net produce, actually cleared $\frac{13}{16}$th fold and that the second Purganah has continued to deteriorate.

8. The Havalie of Vasuntawadah was originally purchased from the Circar in 1805, and in 1807 transferred by private sale for the same price, being about 28 fold of the net profit.

9. It will be seen by the remarks on the Toomedy Purganah that the estate was purchased by *Private Sale* at 16,099 rupees although the Peishcush alone exceeded the estimated revenue, and that, although the collections during the last five years have been rather on the increase, they still continue below the expenditure.

10. In the six villages in enclosure 2 paying Peishcush, the amount of sale will only in one instance be found to have been so low as $17\frac{15}{16}$ fold. I except Bitterzully in which the annual profit is greater than the purchase cost. If therefore 17 fold was a low rate for the purchase in the Collector's Cutcherry of lands paying revenue to Government, the sales of Jaghire, and Mokasa villages, free from all Circar charges would be concluded to afford a rate considerably superior. Consequently, it is difficult to account for the low amount at which Jingere, and Somavarum, a Jaghire, and Mokasa, were disposed of in the courts of this Zillah, the one being at only 14 and the other at less than $5\frac{3}{4}$ fold of the annual net revenue.

11. It is also to be observed with respect to sales in the Zillah Court, that 12 cutties or 172 acres of cuttoobuddy Inam, paying but a trifling rent to the Government, were disposed of at only 4 fold and that a portion of the Lakhiraj village of Ongalore was purchased within six fold the net revenue.

12. These latter sales not having been registered in my Cutcherry, I have referred for information to the accounts of the Curnums of those villages, in which such sales occurred.

13. It will, I think, appear from the inspection of the enclosed statements that land has invariably borne a very high rate of value in the Masulipatam Zillah, far superior indeed to any returns which it could possibly be expected to render, and totally distinct and separate from the calculation of the ratio of profits arising from trade, between which and the value of land, there is generally some affinity.

14. I conceive that the value of land here is chiefly to be ascribed to the authority, both actual and nominal, with which purchasers thereby become invested, and which no speculation in trade however fortunate, could afford a gratification so consonant with their desires and wishes; the actual authority is that which they as landholders possess in common with all Zemindars; the nominal authority, is that assumed by every landholder in taking the title of Rajah, and being so styled by his superiors, and equals among monied men of whom there are many most desirous of purchasing land in preference to every more advantageous mode of outlay. This latter consideration is the principal inducement to possess landed property. The desire on one part to have such assumed title recognized by a Zemindar of ancient family and the refusal on the other to admit such equality of rank led not long since to the rejection of a heavy loan of money tendered at 3 per cent less than it was elsewhere procurable.

15. The value of land has considerably increased since the period at which the sales now submitted took place, and in stating in the 8th and 9th paras of my letter to your Board under date the 31st of Decr. 1824, that lands which on an average of ten years collections had produced but 4,081 rupees from which a Peishcush of 3,799 rupees was levied, could be disposed of for more than the sum of 24,000 rupees which is $307\frac{15}{16}$ fold of the annual net revenue; I was authorized to make the assertion by the proposal of more than one person desirous of becoming the purchaser.

	RS.	AS.	PS.	RS.	AS.	PS.
Average collection				4,081	0	0
Disbursements.						
Proposed Peishcush ...	3,799	0	0			
Sibbundy charges at 5 per cent	204	0	9	4,003	0	9
Net profit				77	15	3
Amount of purchase				2,400	0	0
is $307\frac{15}{16}$ fold of the net annual profit.						

16. The field of dispute respecting jurisdiction would certainly be narrowed, by the mode proposed by the Minute in Council, Viz. of settling that a certain number of years purchase of the clear income should be regarded as the value of the land; and in entering so much into detail of the subject, I have been impressed with the propriety of exhibiting the high rates which the lands of this district bear, and probably those of the Northern Circars generally believing them far to exceed the value of Estates and lands situated in the more southern countries.

MASULIPATAM ZILLAH
COLLECTOR'S CUTCHERRY
AT GOLLAPOLLAM,
21st April 1826.

I have the honour to be,
Gentlemen,
Your most obedient servant,
C. ROBERTS,
Collector.

No.	Name of the Original Zemindary.	Name of the Original Possessor.	Names of the Purchasers.	Disbursements. Peishcush to the Circar. (14) M. Rs.	A.	P.	Charges collection for sibbendy at the rate of 5 per cent. (15) M. Rs.	A.	P.	Total Disbursements. (16) M. Rs.	A.	P.	Net profit to the purchaser. (17) M. Rs.	A.	P.	Amount of sale. (18) M. Rs.	A.	P.	How many folds the amount sale is above that of the profit. (19) Sixteenths.			Remarks.
1	Part of Charmahal.	C. Sohanadry Row.	Sooranany, Lutchinarow Zemindar of Mylaweram.	17,405	4	5	846	13	8	18,252	2	1	...	...	...	24,937	8	0	24,937	8	0	Nos. 1 and 2. These two Purgunnahs were a part of the Char Mahal Zemindary and sold publicly in the Collr.'s cutcherry in liquidation of the arrears of Peishcush of Fusli 1222 to the amount of S. Pag. 10,650 as reported to the Board of Revenue under date 23rd August 1813.
2	Do.	Do.	C. Venkutnursimmarow Zemindar of Bezoara.	11,734	15	11	571	2	9	12,306	2	8	...	...	...	12,377	8	0	12,377	8	0	
3	Vussantavadah.	Tolaty Ramarauze.	C. Venkutrow	7,677	2	6	496	8	0	8,173	10	6	1,756	5	6	49,087	8	0	28	6	0	No. 3. This Mootah was purchased by Tolaty Ramarauze when the aumanie estates were put up to sale in August 1805 who transferred it by private sale on the 10th August 1807 to the present proprietor and registered it in the office of the Collector.
4	Toomedy ...	G. Venkatareddy Puntooloo.	Seragav'ıpoo Bhaganah, 2nd purchaser. C. Janniah who transferred it to S. Venkatapatyrow and Ramachandrarow, the present possessors.	12,043	8	0	652	12	5	12,696	4	5	359	5	5	16,099	12	3	44	13	0	No. 4. This estate was transferred to this Zillah by the Collector of Rajahmundry according to the Provisions of Regulation III of 1804. This Purgannah was first transferred to one S. Bhaganah under a decree passed by the Northern Provincial Court who transferred it by private sale to C. Tammiah, and Janniah transferred it in the name of his nephews S. Venkatapatyrow and Ramachandrarow, Zemindars of Mylaveram and duly registered it in the Collector's Cutcherry.
5	Crootivennoo ..	J. Vizia Ragavah Pudma Nabarauze.	S. Venkut Hanoomanloo, 2nd purchaser, M. Venkut Goondarow who transferred as gift to V. Venkata Reddy Naidoo, the present possessor.	2,940	0	0	179	1	10	3,119	1	0	463	3	2	15,408	12	0	33	4	0	No. 5. This estate was sold on the 28th March 1811 for the recovery of arrears due by the proprietor to the Collector of Rajahmundry, as per orders of the Board of Revenue, dated 21st January 1811 and purchased by one S. Venkat Hanumanloo who having failed to pay a part of the purchase money it was again sold on the 5th November 1811 and bought by M. Venkata Goondarow who transferred it as gift to the present possessor Reddy Naidoo and duly registered it in the Collector's Cutcherry.
6	Padanah ...	E. Gungadara Naidoo.	A. Seetiah	4,174	14	6	269	8	11	4,444	7	5	946	12	1	17,000	0	0	17	15	0	No. 6. This Mootah was transferred by the original proprietor to A. Seetiah by private sale and registered in the cutcherry.
7	Goodoor ..	M. Rachakoomary and Venkatakistoy.	Sanaka Ramaswamy	...	...	...	46	7	2	46	7	2	882	10	3	13,000	0	0	14	12	0	No. 7. This village was a Jagheer to dancing women obtained under the sunnuds of $\overset{c}{\underset{g}{\cdot}}$ Musselmen Government free of tax. It was sold by the Zillah Judge in conformity to the precept of the Northern Provincial Court in satisfaction of a decree passed by them in favour of a creditor Cotah Linga Josy and purchased by S. Ramaswamy, inhabitant of Masulipatam.
8	Chatroy ...	C. Soobiah	Goondarow purchased and given as gift to Chilkany Juggunnadharow.	...	...	...	104	4	0	104	4	0	1,981	0	3	11,200	0	0	5	10	0	No. 8. This village is attached to the Noozeed Zemindary and a Mokasa to C. Soobiah, the maternal uncle of the late Zemindar Ramachendra Apparow. It was sold by the Zillah Court in execution of a decree passed by them in a suit filed by the late Zemindar against the Mokasadar and purchased by Mulrauze Venkata Goondarow who gave it to his relation Chilkany Jaggernatharow as a gift.
9	Ninnacotah ..	Meer Ibrahim ...	B. Casavarow etc.	30	12	7	19	1	5	49	14	0	331	15	10	1,430	0	0	4	5	0	No. 9. This is a portion of the Inam land enjoyed by a Mupolman under a sunnud granted by Alungur Padshah in Hezeree 1102 which was sold by the Musilipatam Zillah Court in 1813 in execution of a decree passed by them against the Inamdar, of which 12 cutties were purchased by B. Cesavarow and 1 cutty by M. Sashiah who obtained certificates from the Zillah Court for their respective portions.
			M. Sashiah	2	9	1	1	12	1	4	5	2	30	12	0	133	0	0	4	7	0	
10	Do. ...	Paulmuca and Kyreneraw.	Dewan Saib and Mohadeen Saib ...	14	11	3	5	15	2	20	10	5	98	3	6	500	0	0	5	1	0	No. 10. This was a Cuttoobuddy Inam under a sunnud granted by an amildar in Huzeeree 1158—the Inamdar sold it himself.
11	Goodewadah ..	Saib John Allerazah.	V. Ramdoss	...	...	...	3	8	9	3	8	9	68	0	3	405	0	0	5	15	0	No. 11. This is a Lakheraj Inam land sold by the Zillah Court in the year 1819 in execution of a Huzreenamah filed in the Sadr ameen's court by the Inamdar. The purchaser obtained a certificate from the Zillah Judge.

MASULIPATAM ZILLAH,
COLLECTOR'S CUTCHERRY
AT GOLLAPALLAM,
21st April 1826.

C. ROBERTS,
Collector.

Letter—from the Principal Collector of Madura.
To—the President and Members of the Board of Revenue.
Dated—8th May 1826.
No.—830.

GENTLEMEN,

I have the honor to acknowledge the receipt of your Secretary's letter of the 16th February, together with extract from the Minutes of Council, dated 23rd September 1825, directing me to report on the value of land in the several cases contained in the queries subjoined, but I must here remark that since I have been a Collector, I do not recollect an instance of having sold lands for the realization of the Revenue. The replies therefore to the queries are from the information which I have obtained from individuals.

2. (1) When the land sold is a Zemindary, or portion of a Zemindary, assessed in perpetuity with a fixed revenue under Regulation XXV of 1802?

A. 1. The sale of a Zemindary or a portion of it, must of course depend greatly as to whether the Istimrar be favourable or unfavourable. Supposing the former, it does not appear that it would yield more than ten fold of the clear net income to the possessor.

(2) When the land sold is not a Zemindary or a portion of one, but a private estate, farm or field, or a share in an entire village meerassy held by a ryot and assessed with revenue payable directly to the Collector and his servant, or to a Zemindar and his servants?

2. It seems the actual clear income to the possessor is ascertained as nearly as can be, and about ten years purchase can be obtained for it.

(3) When the land sold is a jaghere or entire village, such as Shotriyom etc. paying a small quit rent ?	3. *Vide* 1st reply. In some villages the Shrotrioumdar is proprietor of the land—in some a sharer with the inhabitants, and in some only proprietor of the Melwarom share. Whatever might be the income, if the purchase money were more than ten fold, it would prove detrimental to the purchaser, because he stands the chance of favourable and unfavourable crops, whilst the seller is more sure of gaining 12 per cent. for his money.
(4) Whether the land is a jaghere or entiervillage exempt from the payment of all revenue ?	4. *Vide* 2nd reply for the purchaser might be a loser if he paid more.
(5) When the land sold is an Inam, or certain lands or fields not extending to an entire village paying a small quit rent ?	5. *Vide* 2nd reply.
(6) When the land sold is an Inam, or certain lands or fields not extending from to an entire village exempt the payment of all revenue ?	6. *Vide* 2nd reply.

From all enquiries, for I cannot as already stated, speak from the experience of having disposed of lands by sale, it appears that the value of land rarely exceeds more than ten fold the actual annual net income to the possessor, and with such a valuation, all whom I have consulted, consider it sufficient.

I have the honor to be, with great respect,
Gentlemen,
Your most obedient faithful servant,

R. PETER,
Principal Collector.

Letter—from the Principal Collector of Coimbatore.
To—the President and Members of the Board of Revenue.
Dated—17th June 1826.
No.—1104.

GENTLEMEN,

I have been endeavouring for the last three months to obtain correct information regarding the value of landed property in Coimbatore. The mass of accounts which has been collected, although often revised, is still too incorrect, to admit of being laid before the Board and under an apprehension that further delay may be attended with inconvenience, I must content myself at present with giving general answers to the queries circulated in Mr. Dent's letter of the 16th February.

2. The 1st, 3rd and 4th queries do not apply to Coimbatore. There are no Zemindaries, no entire villages exempt from the payment of all revenue, and with the exception of the villages lately conferred on Govind Row, no shrotrium villages.

3. The 2nd query is answered in the annexed statement which shews the extreme and average value of each description of land paying revenue to Government, calculated upon the purchase of the net rent :—

—	Common Poonja & Bulla consisting acres $3\frac{13}{16}$ and 391 feet.			Well lands & Bulla consisting acres $3\frac{13}{16}$ and 391 feet.			Orchard Plantations & canny consisting acres $1\frac{5}{16}$.			Nunja and canny consisting acres $1\frac{5}{16}$.		
	High.	Low.	Mean of Extreme.	High.	Low.	Mean.	High.	Low.	Mean.	High.	Low.	Mean.
	Y. M.	Y. M.	Y. M.	Y. M.	Y. M.	Y. M.	Y. M.	Y. M.	Y. M.	Y. M.	Y. M.	Y. M.
Number of years purchase of the net rent.	7 4	2 4	4 10	8 3	4 7	6 5	10 5	6 2½	8 3¾	5 10½	2 2½	4 ½

4. The quantity of land in Coimbatore, subject to a light quit rent is very small, and that of land exempt from all payment still smaller—the 5th & 6th queries are answered in the following statements :—

Value of Lands paying a small quit-rent.

—	Common Punja and Bulla.			Well lands and Bulla.			Common Nunja lands and canny.		
	High.	Low.	Mean.	High.	Low.	Mean.	High.	Low.	Mean.
	Y. M.	Y. M.	Y. M.	Y. M.	Y. M.	Y. M.	Y. M.	Y. M.	Y. M.
Number of years purchase of the Net rent.	7 7	4 4	5 11½	8 10	5 2	7 0	8 10½	5 4½	7 1½

Value of Lands exempt from the payment of revenue.

Number of years purchase of the Net rent.	11 3	4 8	7 11½	10 3½	4 7½	7 5½	8 5	6 6	7 5½

5. I hope to be able in a short time, to submit more detailed, and more satisfactory information on this subject.

I have the honour to be,
Gentlemen,
Your most obedient servant,
(Sd.) J. SULLIVAN,
Principal Collector.

Letter—from the Principal Collector of Canara.
To—the President and Members of the Board of Revenue.
Dated—27th June 1826.
No.—1198.

GENTLEMEN,

I have the honor to acknowledge the receipt of your secretary's letter of the 16th February last, directing me to ascertain and report for how many fold of the clear net annual income yielded to the possessor, land in this district generally sells, in the cases recapitulated in that letter.

2. Of the several descriptions of land noticed in the letter now acknowledged, there seems to be only one generally applicable to Canara, viz., the 2nd in which is included " Land not a Zemindary or a portion of " one, but a private estate farm or field held by a ryot and assessed to the " revenue payable directly to the collector and his servants."

3. Nearly the whole of the lands in Canara are of this description, being the property of the individual who can sell or alienate them as he thinks proper. There are a few wargs or estates, however in every Taluk, that are the property of the Circar, but these do not seem to come under any of the descriptions, for they are of no value so long as they remain so, and are always granted on Moolpatty to any one who will pay the

Beriz fixed upon them, and thus they will come under the same denomination of private property.

4. There are no Zemindary or Jaghire lands in the district, and only one Inam land, not extending to an entire village, the revenue of which was given up in lieu of a similar sum formerly granted in Inam to the proprietor, in the Chittoor district.

5. The object of Govt. as expressed in the Minute dated the 23rd of Septr. being to ascertain as nearly as possible the value of land liable to be the subject of the litigation in each province or zillah, it will be sufficient for me to confine myself at present to the subject of the estates in the district that are private property, the Circar lands not being so situated that their value can be contested in a Court of Law, and the Inam lands too few, and unimportant, to call for observation on this occasion.

6. There is perhaps no portion of the Hon'ble Company's territories where the value of land differs more than it does in Canara, and where consequently a greater variation in the selling price will be found. Lands situated near a port of export, or on the banks of a river in the neighbourhood of a populous town, or otherwise possessing local advantages, being productive and of a good description of soil, or where the Gueny or rent, is receivable in kind and at the same time lightly assessed to the revenue will sometimes sell as high as 16 years purchase of the net annual profit from it ; whilst other estates less favoured in these respects, will not produce more than 8 years purchase, and some, situated near the jungles, in unhealthy places and at a distance from the means of conveying the produce to market, however productive they may be, are altogether unsaleable, and are frequently abandoned by their owners, although the land revenue be extremely light.

7. The additional value of land the rent of which is payable in kind is owing to the manner in which the calculation of the value of the grain or garden produce, is made, being upon the Rivas (or customary) price, which is seldom more than two-thirds and sometimes only one half of its value in the market ; the difference consequently adds to the value of the land very materially.

8. The rate of Gueny or rent of rice land paid in grain, is as follows viz :—

For the best or low lands well watered, called Byle, one morah (that is as much land as is sufficient for one morah of seed) from 1 to 4 pagodas, or rice morahs 3 to 12.

For the second kind of land or majel-for one morah, Fanam 6 and 10½ annas to 3 pagodas, or morahs of rice 2 to 9. For the third or high land called Bett ; for one morah of seed, from Fanams 3 and 5¼ annas to 1 pagoda or rice morahs from 1 to 3.

In garden lands, the Gueny or rent payable by the cultivating tenant to the landlord is fixed with reference to the quantity and quality of the produce calculated on the number and description of trees. If the Gueny is payable in money, it is generally at from pagodas 3 fanam 7 8 annas to pagodas 7 fanam 5 for 100 cocoanut trees and from 12 to 24 pagodas for 1,000 Sooparee trees if it is paid in kind, 1,000 cocoanuts are valued at from 2½ to 3 Hoons, and one candy of sooparee, at from 3 to 9 Hoons, and as the price agreed upon is generally, as in the case of rice, much below the market price, gardens the rent of which is paid in kind, are more valuable than where a money rent is taken.

9. The Beriz or revenue payable to Government from the lands differs as much in the several taluks as the Gueny or rent-it may be taken as follows viz. :—

Rice lands.

	P.	f.	a.		P.	f.	a.	
On the first sort	0	7	4	to	2	8	6	per morah of seed.
Do. second sort	0	4	14½	to	2	1	14	do.
Do. third sort	0	2	6¼	to	0	7	0	do.

Garden Lands.

	P. f. a.	P. f. a.	P. f. a.	P. f. a.
From	2 5 0 to	5 0 0 for 100 cocoanut trees and from	8 0 0 to	16 0 0 for 1,000 sooparee trees.

10. It appears to me that with a view to narrow still more the field of legal dispute respecting the value of landed property to be adjudicated by the courts, it may be advisable to fix at the same time an average rate of Gueny on each description of property; but as this rate differs so much in the different Taluks it will in such case be desirable to fix a rate for each Taluk with this rate before it. The Beriz on each estate being fixed and known, the court can at once determine the value of the land under litigation, by deducting the Beriz from the average Gueny so determined, and multiplying the remainder by the average number of years purchase of the land. Without some arrangement of this kind, a court will not always be able to determine, without a long examination, the actual profit of his estate to a proprietor, for in the greater number of estates the owner receives no Gueny, but is himself the cultivator of his land, and consequently the rent or Gueny is not known. In such cases the Gueny paid by the cultivators of the neighbouring estates, is always taken by the intended purchaser, as the basis of his calculation, and if an average be not fixed, the same standard must be adopted in any general arrangement for determining the value of the land for legal purposes, which, in every case that comes before a court, will involve some trouble, and an examination of oral and documentary evidence, that will be avoided by taking on average as I have suggested.

11. This average Gueny being taken, will also prevent any fraudulent collusion between a tenant and his landlord, to conceal the real rent or Gueny and thereby hinder the value from being ascertained, and will do away the necessity of determining by evidence the amount payable when, (as frequently occurs) no Gueny chit (or lease) is granted to the tenant by the landlord.

12. The general value of estates in this Province varies according to the circumstances. I have noticed of local and other advantages, from 8 to 16 years purchase, but by far the greater number of lands including all those not particularly well or ill situated, are sold at 10 years purchase, which should in my opinion be the rate to be fixed on all land in the courts of law.

13. There is another species of property, which may be called Landed, that is common in Canara, and which, though not included in any of the descriptions noticed in the Board's letter, is of some extent, and is very frequently the subject of litigation. I allude to lands appropriated to the manufacture of salt. These should of course be included in any general arrangement for valuing landed property with a view to adjudication and in doing so the same rules may be observed.

14. Salt pans are either rented to a manufacturer for a certain portion of the produce, varying from one half to two thirds, or the owner himself manufactures it by means of hired labour, the latter is by far the most frequent practice.

15. Nearly as much difficulty of fixing an average value of the property for the whole province exists here as in the case of rice and garden lands for the price paid for the salt differs in every Taluk, as does the hire of the manufacturer, and the Gueny or rent of the pans; whilst the situation of the latter, with reference to the general stores, means of carriages, and other circumstances, tends materially to alter the net produce of the property to the owner; there will be little difficulty however, in ascertaining the fair value of the pans of each Taluk, on the principle of an average of the Gueny in the Taluk, as proposed for the other lands.

16. The value of a salt pan in Canara may be considered to be from 8 to 12 years purchase of the net income to the owner and the same average of 10 years, should, I think, be considered as its value in determining the amount to be litigated.

17. In almost all mortgages of land, the interest payable by the borrower, on the sum advanced, is 10 to 12 per cent in Canara, but when the mortgagee expects that the mortgage will be foreclosed and the land will ultimately belong to him, he will not unfrequently content himself with 8 per cent per annum. The rate of interest on other property is much higher than on land, money being seldom advanced on the former, at a less rate of interest than 18, and frequently as high as 24 per cent, is demanded and paid.

18. Before concluding the subject I take the liberty of bringing to the notice of the Board with the view of obtaining information a part of the enclosure in the letter to which I am now replying, which I do not clearly comprehend.

19. In the 5th para of the Minute of Government forwarded with your secretary's letter, it is stated that the 1st and 2nd Judges of the Western Division proposed as the most accurate mode of valuing land *in that Division*, that it be taken at not less than 25 years purchase of the annual income derivable to the proprietor from the entire produce, after deducting the charges of management and the public assessment. The high authority from which this opinion is stated to have emanated induced me to pause before I ventured to oppose it by that which I have formed and to call for accounts of sales in every Taluk, and for the sentiments of the most experienced of the native revenue officers of the province, before I replied to your letter upon the subject. The result of these references is, as I have already stated, that the value of land in this Province, does not exceed in any case 16 years purchase, that it is frequently sold as low as 6, and that the average, under ordinary circumstances, is 10 years purchase only.

20. In the same document it is stated that land in Malabar is worth from 20 to 40 years purchase, and I am inclined to think that the observations of the 1st and 2nd judge of Circuit must have been intended to be confined to that province, where land is much more valuable than in Canara, and where, generally speaking, the assessment is very much higher. It is impossible for me, in any other way to account for this opinion, for I do not believe that there is a single instance, on record of land in Canara being sold even at the lowest rate (of 20 years purchase) stated to be usual in Malabar ; and to fix the value at the proposed rate of 25 years purchase would be upwards of 100 per cent above the usual selling price of land in this district.

21. As it would appear from the communication to which I have now the honor to reply, and from the Board's letter of the 23rd of March last, that some legislative measures are in contemplation regarding landed property in Canara, I deem the present a fit opportunity to express my opinion, that an enactment rendering it imperative on individuals to record within a given period either in the office of the collector or the taluk cutcherry, all sales, transfers, gifts or mortgages of lands, would be a measure well calculated to facilitate the adjustment of disputes, and the decision of suits regarding such transactions and at the same time be attended with much benefit, in securing to the proprietors of petty estates their rights and privileges, of which, it is to be feared they are under the present system, too often dispossessed by successful fraud and perjury.

22. Regulation XXVI of 1802 having been considered as generally inapplicable to Canara the provision of Section III which declares that transfers of land shall not be valid in the civil courts unless duly registered in the Revenue department, has never been acted up to in this Province, even since the enactment of Regulation I of 1819 which admits of the division of estates into small portions, and, in that respect renders the former Regulation applicable to landed property on the Western Coast.

23. In consequence of proof of the Registry of Deeds of sale, transfer, mortgage etc. of land not being required by the civil courts, few people avail themselves of the privilege of registering their Title Deeds in the

Zillah Court, and though purchasers frequently get the lands they may have bought, entered in their names in the Taluk accounts, yet as this practice is optional on their part, and is not regularly adopted those registers are very deficient, and cannot be relied on.

24. The irregular manner in which Deeds of Sale and Mortgage bonds are executed, and attested (some times by persons not present at the time of execution) would, if duly brought to light, render numbers of them invalid. Continued complaints are made by parties in suits, that documents filed by their opponents are forgeries, and where false evidence is procurable with such facility (and hardly a case is decided by the courts, in which the evidence adduced on one side, is not in direct contradiction to that on the other) a man so disposed has strong inducement to bring forward false documents, for he has every prospect of their being received as genuine by means of the witnesses he can suborn in support of them.

25. The majority of the landed proprietors in Canara are unable to write and they generally trust to the Shanbogues of their villages (than whom there is not a more imprincipled set of men in existence) for the preparation of all written instruments connected with their estates. That Deeds of Sale are frequently substituted for mortgage bonds, by the connivance of these people, with the money lenders, I have not the slightest doubt. The discovery is perhaps not made till months after the signature of the document, when the borrower finds he is paying rent to a landlord, instead of interest to a mortgagee. It is in vain for the party duped to attempt to bring evidence of the fraud ; witnesses are ready on the other side, to swear to the actual sale ; the deed is produced, the signature admitted, or proved, and he is ultimately ejected, by a decree of the Munsif, from the possession of his hereditary estate.

26. It may be said that persons thus duped suffer justly for neglecting to exercise due caution in their dealings with money lenders, but even ordinary caution, ignorant as they are of writing, and surrounded perhaps by interested, crafty men, would not in such case, save them ; and it is unquestionably the duty of the legislature to adopt every means in their power, for the protection of the ignorant and unwary part of the community, against the attempts of a set of designing knaves, who make themselves acquainted with every clause of the Regulations that they may take advantage of them to over-reach their neighbours.

27. Under a conviction that the measure I have suggested will be productive of much good, if carried into effect, I have deemed it my duty to lay it before the Board, that should it appear to them expedient and proper, it may be ultimately submitted to Government.

28. In my letter to the Board under date the 4th of November 1825 I noticed that Regulation V of 1822 had never been carried into execution in this Province and that it appeared desirable that some of its provisions should be enforced; in the Board's letter of the 23rd March last I was informed in answer that Govt. had resolved to rescind that Regulation and to substitute other provisions in its stead. Under these circumstances, it will not perhaps be expected that the local revenue authority should offer an opinion on the subject, but I do not think I shall err much, in replying to a reference regarding the value of land in the district, if I venture again to notice the subject of that letter, and respectfully to repeat my conviction, that, with very little modification, the provisions of Regulation V of 1822 are well calculated in many respects, to benefit the land owners and cultivators of Canara.

I have the honor to be,
Gentlemen,
Your most obedient servant,

MANGALORE, (Sd.) J. BABINGTON,
27th June 1826. *Principal Collector.*

Letter—from the Collector of Salem.
To—the President and Members of the Board of Revenue.
Dated—20th June 1826.
No.—1118.

GENTLEMEN,

I have the honor to acknowledge the receipt of your instructions under date the 16th February last directing me to report on or before the 5th of last April "how many fold of the clear net annual income yielded to the possessor, land in this district generally sells for, in six different cases" therein stated.

2. I have also to acknowledge the receipt of your Secretary's letter under date the 1st instant reminding me that the report above called for had not been received and I beg to submit in explanation that your Secretary's first letter on the subject was addressed to the Head Assistant in charge during my absence from the district and that I did not return till nearly a month after its receipt leaving only a very short time to obtain the necessary information previous to the date on which the report was directed to be despatched and which I was quite unable to procure on so short a notice.

3. I now proceed to submit all the information I have been able to procure respecting the value of the land in this district and to transmit for the consideration of your Board the accompanying statement showing the result of actual sales which have from time to time taken place.

4. In reply to the first question it will be seen by the statement that a Zemindary, or portion of a Zemindary, sells from $1\frac{10}{64}$ to $5\frac{30}{64}$ fold (see Nos. 43 & 44).

5. With respect to the second case when the land sold is "a private estate (not being a Zemindary or portion of a Zemindary) farm or field or a share in an entire village Meerassy held by a ryot" as there is neither farms or village Meerassy in this district, I can only reply to the question so far as it relates to fields or Put=Kut amanee lands which sell from $2\frac{20}{64}$ to $26\frac{32}{64}$ (see Nos. 5 & 24).

6. As there is only two Jagheers or Shrotriums paying a small quit rent in the district and they never having been sold, I am prevented from replying to the third question.

7. In reply to the 4th query I beg to submit that only one entire village exempt from the payment of all revenue has been sold for $8\frac{12}{64}$ which is not nine years' purchase (see No. 57).

8. With reference to the 5th case it appears that such lands as therein mentioned sell from between $8\frac{27}{64}$ to $14\frac{22}{64}$ except the land is held under a swastum tenure when it rises to $18\frac{48}{64}$ (see Nos. 51, 58, 61).

9. When the land sold is an inam or fields not being an entire village and exempt from the payment of all revenue it sells for $11\frac{40}{64}$ to $12\frac{55}{64}$ years' purchase (see Nos. 59, 60).

10. As there is no register kept in a Collector's Cutcherry of the sale of many of the lands respecting which information is wanted, the Court may be able to furnish more correct and extensive information as all land sold of every description in satisfaction of decrees is registered there.

11. The accompanying statement might be lengthened to almost any extent but it appears sufficient in its present state to enable your Board to determine the average value of land but if it is found defective the whole of the papers in the native language from which it has been made out, can easily be transmitted.

I have the honor to be,
Gentlemen,
Your most obedient servant,
M. D. COCKBURN,
Collector.

Letter—from the Principal Collector of Cuddapah,
To—the President and Members of the Board of Revenue.
Dated—28th March 1828.
No.—635.

GENTLEMEN,

With reference to your Secretary's letters dated the 16th of February and 1st of June 1826, I have the honour, herewith, to transmit to you the information required relative to the value of land in this district. There can be no doubt that land paying revenue to Government is acquiring a new value, and it may be anticipated that its worth will be progressively enhanced.

I have the honor to be,
Gentlemen,
Your most obedient and humble
servant,
(Sd.) J. A. DALZELL,
Principal Collector.

ANNEXURE.

Cases.	*Answers.*
1. When the land sold is a Zemindary or portion of a Zemindary, assessed in perpetuity with a fixed revenue under Regulation XXV, 1802.	There are no Zemindary lands in the district of Cuddapah held under the tenure recognised by Regulation XXV of 1802.
2. When the land sold is not a Zemindary or a portion of one, but a private estate, farm or field, or a share in an entire village Merassy held by a ryot, and assessed with revenue payable directly to the Collector and his servants, or to a Zemindar and his servants.	There are a few instances where land, not being a Zemindary or a portion of one but a private estate, farm or field or a share in an entire village Merassy, held by a ryot and assessed with revenue payable directly to the collector and his servants, has been sold. The average price of each kind of land may be quoted as follows ; Viz.

Black land	2½ to 3
Mixed ditto	2½ to 3
Red ditto	2½ to 3
Garden land	3 to 3½
Wet land	3½ to 4
Cocoanut gardens, etc.	5 to 5½

Fold of the clear net annual income yielded to the possessor after deducting the expenses of cultivation and the sums paid to the Sircar. It may be observed that considerations besides the mere annual income derived from the land affect the price. Thus a portion of dry land yielding an annual income of Rs. 20 will not sell for the same amount as wet land yielding the same sum. The reasons may be, that the expenses of cultivating dry land are greater than those of cultivating wet land, that the risk of the failure of crops from an excess or deficiency of rain is greater, upon the whole, in dry than wet land, and that the remissions of rent are more proportionate to the actual incidents of the year in the case of wet land than of dry. In short, the cultivation of wet land is attended with a less uncertain profit, than that of dry.

Cases.	*Answers.*
3. When the land sold is a Jaghire or entire village such as a Shrotrium etc. paying a small quit rent.	There is no instance of Jaghire land or an entire village, such as a Shrotrium paying a small quit rent, having been sold. From the information of the best informed natives it is understood that a sum equal to seven years clear profit is considered amongst themselves as a fair price.
4. When the land sold is a Jaghire or entire village exempt from the payment of all revenue.	The remark in the preceding answer applies to this case, but the valuation is ten and a half fold upon the possessor's profits.
5. When the land sold is an Inam, or certain lands or fields, not extending to an entire village, paying a small quit rent.	There are few instances of lands or fields being Inam not extending to an entire village and paying a quit rent to Government, having

Cases.	*Answers.*
	been sold. The average rate of sale for each kind of land has been— Dry land ... ... $5\frac{1}{2}$ to 6 fold. Garden ditto ... ... 6 to $6\frac{1}{2}$ Wet ditto ... ... $6\frac{1}{2}$ to 7 ,,
6. When the land sold is an Inam or certain lands or fields not extending to an entire village exempt from the payment of all revenue.	Inams, or fields not extending to a whole village and not paying quit rent to Government, have been sold at an increased price, and the average may be quoted as follows :— Dry land ... 7 to 8 years' profit. Garden ... ... 8 to $8\frac{1}{2}$,, Wet ... ... $8\frac{1}{2}$ to 9 ,, Cocoanut gardens. $8\frac{1}{2}$ to 10 ,,

The cases embrace all the different kinds of tenures usual in this district.

J. A. DALZELL,
Principal Collector.

7-A

SECTION C.

SELECTIONS FROM THE RETURNS FURNISHED BY DISTRICT COURTS TO COURTS OF ADALAT.

NOTE.—Two calls for information were issued by the Court of Sadr Adalat, and hence some of the returns printed from the same Court bear different dates, viz., August or September 1827 on the one hand and December 1827 or January 1828 on the other.

Extract from the letter of the Register, Provincial Court of Appeal, Centre Division, to the Judge of the Court of Adalut in the Zillah of Chingleput, dated the 20th March 1826.

* * * * *

In return to this precept directing to furnish certain information required by the Board of Revenue; the Judge in the Zillah of Chingleput regrets that the records of this Court do not afford the information called for, the account sales of lands sold by order of this Court do not show either the amount of revenue payable to Govt. or the expenses of management it is impossible therefore to ascertain from these sources how many fold of the clear net annual income the lands may have produced when sold.

2. The Zillah Judge has however annexed to each query such information as he has been able to collect from the records of his office, and which is herewith transmitted.

Given under my hand and the seal of the Court at Chingleput this 6th day of July in the year of our Lord one thousand eight hundred and twenty six.

(Sd.) J. G. PASKE,
Judge.

Of the clear net annual income yielded by litigated land to the party in possession how many fold has the said land, when sold, in general produced in the following cases :—

1*st.* When the land sold was not Zemindary or a portion of one, but a private estate, farm or field or a share in an entire village meerassy held by a ryot and assessed with revenue payable directly to the collector and his servants or to a Zemindar and his servants.

Many shares of village meerassy have been sold by the court, but the accounts of the court do not show the revenue payable by each lot or the expense of management, etc. The Zilla therefore is unable to state how many fold of the net annual income the said land produces.

But the Zilla Judge subjoins a list of certain meerassy shares sold by the court with the prices paid for each lot and the Zilla Judge trusts that as the revenue payable by these lands and the expenses of management, etc., may be obtained on reference to the revenue authorites the information required may thus be procured :—

Number of causes in which the lands were sold.	In what village the lands in question are situated, the names of the persons who purchased them and the year in which they were sold.	Number of cawnies sold by the court.			Amount for which the land sold.

To

THE REGISTER TO THE PROVINCIAL COURT OF APPEAL,

CENTRE DIVISION, CHITTOOR.

In further return to the Provincial Courts precept which accompanied an extract from their proceedings of the 20th of March transmitting copy of a letter under date the 16th of the said month received from the Deputy Register to the Sadr Adalut with copy of a communication from Government directing the several Zillah Judges to furnish certain information pointed out by the Board of Revenue the Zillah Judge of Chittoor regrets that the records of the court do not fully afford the information called for, the account sales of lands sold by order of the court are altogether silent as to the amount of revenue payable to Government upon the said lands and as to the expenses of management, it is therefore impossible to ascertain from these sources how many fold clear net annual income the said lands may have produced when sold.

2. The Zillah Judge has however annexed to this return such information as he has been able to collect from the records of his office and presumes that the collector of the zilla will be able immediately to set forth that information which it is not in the power of the court to exhibit.

Given under my hand and the seal of the court this 10th day of August A.D. 1826.

(Sd.) G. J. WATERS,
Judge.

Of the clear net annual income yielded by litigated land to the party in possession how many fold has the said land when sold, in general produced in the following cases :—

1st. When the land sold was not Zemindary or a portion of a Zemindary but a private estate, farm or field or a share in an entire village meerassy held by a ryot, and assessed with revenue payable directly to the collector and his servants or to a zemindar and his servants.	Five lots of land of the descriptions specified in this query have been sold by the court and will be found particularized in the accompanying list A which if forwarded with the accompanying other lists to the collector can be filled up by the revenue officers with the account expense of management, amount of revenue, and real value or sale net fold of annual income, for this purpose 3 columns have been left open and headed with those particulars.
2nd. When the land sold was a Jagheer or entire village such as a Shrotrium, etc., paying a small quit-rent.	A statement marked B of the sale of the land of this description is herewith sent.
3rd. When the land was a Jagheer or entire village such as Shrotrium exempt from the payment of all revenue.	It appears that no land coming under this description has been sold by the court.
4th. When the land sold was an inam or certain lands or fields not extending to an entire village paying a small quit-rent.	A statement marked C of the sale of land of this description is herewith sent.
5th. When land sold was an inam or certain lands not extending to an entire village exempt from the payment of all revenue.	A statement marked D of the sale of this description of land is herewith sent.

(Sd.) G. J. WATERS,
Judge.

CHICACOLE ZILLAH,
REGISTER'S OFFICE,
22nd Feby. 1828.

(Sd.) P. H. STRUMBOM,
Register.

N.B.—The Vrottee contains no defined measurement : where villages are acquired by a family or society of Brahmins it is alloted into a certain number of shares differing according to the number of share holders the extent of which varies from the same cause. These shares are again susceptible of sub division into halves, quarters, eighths and sixteenths sevarally called Ardha Vrottee, Panteekah, Parakah, and Veesum so that unless the actual extent of land or value of produce is mentioned which is seldom the case the relation between the purchase money and the property sold is difficult to ascertain ; Such as are inserted were generally procured from local enquiry on drawing up this table.

(Sd.) P. H. STRUMBOM,
Register.

CHICACOLE ZILLAH REGISTER'S OFFICE,
22nd February 1828.

(Sd.) P. H. STROMBOM,
Register.

N.B.—The average value of a garce is estimated in this Zillah at 20 Rupees.

(True Copy.)

(Sd.) SEP MONEY,
3rd Judge for the Register.

SECTION D.

A.D. 1833. Regulation III—Fort St. George.

A Regulation for conferring upon Sadr Ameens jurisdiction in criminal cases and for extending the civil jurisdiction of Registers, sadr ameens and District Munsiffs.

Preamble.

Whereas the administration of justice in the provinces will be facilitated by conferring upon Sadr ameens jurisdiction in criminal cases, and by extending the jurisdiction of the Registers, the Sadr ameens and District Munsiffs, in regard to the amount and value of property which may be adjudicated by them respectively, the following rules have been enacted to be in force from the date of their promulgation.

Criminal, joint criminal and native criminal judges authorized to employ the sadr ameens in the investigation and decision of criminal cases.

To exercise the powers conferred upon criminal judges.

Exception.

II. *First.*—The criminal, joint criminal and native criminal judges are hereby authorized to employ the Sadr ameens in the investigation and decision of criminal cases. In the investigation and determination of such cases, they shall be guided by the rules laid down for the observance of criminal judges in similar cases, and shall exercise the powers conferred upon those officers by the regulations provided that cases committable for trial before the Court of Circuit, shall not be cognizable by sadr ameens and that those judges shall have authority to overrule such judgments passed by the sadr ameens attached to their courts respectively as may be contrary to the regulations and to justice and that no sadr ameen shall be employed at any other than the station of the court except under the authority of the Foujdaree Adalut and with the sanction of the Government. Provided also that they shall not have jurisdiction in cases where an American or European is concerned, nor over the offences specified in Regulation III of 1819.

Not to be employed at any other than the sadr station without the authority of the Foujdaree Adalut.

Not to have jurisdiction in cases where an American or European is concerned nor over the offences specified in Regulation III of 1819.

Oath to be taken by the sadr ameens.

Or to subscribe a solemn declaration to the same effect.

Second.—Previous to the execution of the duties of their office sadr ameens shall take and subscribe before the officer presiding in the criminal courts to which they are attached, an oath according to the form prescribed in the appendix to this regulation or he shall subscribe a solemn declaration to the same effect.

Jurisdiction of Registers extended to 3000 rupees.

III. In modification of the provisions of Section II Regulation II of 1821 the judges of zillah courts are hereby authorized to refer to their Registers for trial and decision any suits or appeals, filed in their respective courts for Malguzary land, of which the annual produce shall not exceed 3000 Madras rupees or for Lakhirajee land, the annual produce of which shall not exceed 300 Madras rupees or for other real property not of the description above specified or for sums of money or other personal property, the amount or value of which shall not exceed 3000 Madras rupees.

Jurisdiction of sadr ameens extended to 2500 rupees.

IV. In modification of the provisions of Section III Regulation II of 1821, zillah, assistant and native judges are hereby authorized to refer to the Sadr ameens for trail and decision any suits filed in their respective courts for land exempt from the payment of revenue, the annual produce of which shall not exceed 250 Madras rupees and for land subject to the

payment of revenue in money or in kind, the annual produce shall not exceed 2500 Madras rupees or for other real property, not description above specified, or for sums of money or other personal property the value or amount of which shall not exceed 2500 Madras rupees.

Jurisdiction of district munsifs extended to 1000 rupees.

V. The jurisdiction of district munsifs as defined in section XI Regulation VI of 1816 is hereby extended in regard to suits of the description specified in clause second of that section to 100 Madras rupees and in regard to suits of the descriptions specified in clauses third, fourth and fifth of that section to 1000 Madras rupees.

Sadr ameens guilty of gross acts of misconduct to be suspended.

And the circumstances of the case reported through the provincial court to the Sadr Adalut.

VI. Whenever a sadr ameen may be guilty of any gross act of misconduct the zillah, assistant and native judges, are hereby authorized to suspend him from his office, but they shall report the circumstances of the case without delay to the provincial court for the final determination of the court of Sadr Adalut.

APPENDIX.

Form of oath to be administered to Sadr ameens invested with criminal jurisdiction.

I, A.B. sadr ameen of the Zillah court of————solemnly swear, that I will act with impartiality and integrity and will not exact or receive, nor knowingly allow any other person to exact or receive directly or indirectly any fee reward or emolument whatsoever in the execution of or on account of any matter relating to the duties of my office excepting such as the orders of the Governor in Council do or may expressly authorize and that I will perform the duties of my office according to the best of my knowledge, abilities and judgment conformably to the regulations that have been or may be passed by the Governor in Council.
